## Summary

Aspiring Computer Scientist, passionate in backend development, functional programming, and computer security. Super nerd with a professional attitude who loves Vim, GNU/Linux, OS X and enjoys customizing my development environment. I became comfortable with unix and its associated technologies after completing a Linux From Scratch build. I have cultivated an excellent work ethic through my life on the family farm. I am experienced in: Node.js, Python, Haskell, Java, C/C++, Latex, Unix, Git

## Work Experience
